PROFESSIONAL SUMMARY

I'm a passionate and results-driven full-stack web developer with 2 years of hands-on experience in building responsive, user-focused web applications. I work comfortably across both frontend and backend, with a strong foundation in technologies like HTML, CSS, Tailwind CSS, JavaScript, TypeScript, PHP, and frameworks including Vue.js, Next.js, Laravel, Adonis.js, and Express.js.

I enjoy bringing ideas to life through clean, maintainable code—whether it's crafting intuitive user interfaces or developing robust backend systems. I've worked with MySQL and PostgreSQL to build efficient, scalable databases and have experience integrating RESTful APIs to connect systems and improve functionality.

Beyond development, I'm skilled with tools like Jira, Click Up, Microsoft 365, Google Workspace, MATLAB, and Canva, helping me stay organized, collaborative, and creative throughout each project. Whether I'm working independently or as part of a team, I bring strong communication, problem-solving, and time management skills to the table.

I'm always looking for ways to grow and improve—both technically and professionally—and I take pride in delivering work that's not only functional but adds real value to users and businesses alike.

EDUCATION

Bachelor of Technology in Mechanical Engineering

Ladoke Akintola University of Technology

September 2016 – July 2023

Relevant Coursework: Process safety, Thermodynamics I-II, Separation processes I-II, Reaction kinetics and Fluid flow through porous media, Biomass production.

Design With Blocks Academy

Web Development Program

June 2021 – December 2021

Relevant Coursework: HMTL, CSS, PHP, MySQL.

EXPERIENCE

Full Stack Developer (Remote) Stringify

Mar 2025 – Present

- Developed a dynamic web application using Next.js (frontend) and Node.js/Express (backend), showcasing strong full-stack development skills.
- Led a cross-functional team in developing a dynamic web application using Next.js (frontend) and Node.js/Express (backend), ensuring seamless collaboration and high-quality deliverables.
- Coordinated task allocation and progress tracking, integrating third-party APIs and services to enhance functionality and ensure efficient data flow between system components.
- Oversaw backend optimization efforts, improving PostgreSQL query performance, implementing caching strategies, and managing high traffic loads through Adonis.js tools such as queues, schedulers, and in-built caching.
- Organized regular code reviews, stand-up meetings, and deployment planning sessions, ensuring team accountability and continuous improvement throughout the development cycle.

- Integrated third-party APIs and services to enhance application functionality and ensure smooth data exchange.
- Improved backend performance by optimizing PostgreSQL queries, implementing caching strategies, and managing high traffic loads using Adonis.js tools such as queues, schedulers, and in-built caching.

Full Stack Developer Internship (Remote) - Stringify

Dec 2024 – Mar 2025

- Developed a dynamic web application using Next.js (frontend) and Node.js/Express (backend), showcasing strong full-stack development skills.
- Integrated third-party APIs and services to enhance application functionality and ensure smooth data exchange.
- Improved backend performance by optimizing PostgreSQL queries, implementing caching strategies, and managing high traffic loads using Adonis.js tools such as queues, schedulers, and in-built caching.

National Youth Service Corps (NYSC)

Nov 2023 – Nov 2024

Administrative /IT Support – Infinity Express, Lagos State

Mandatory one year program for all Nigerian graduates

- Assisted in coordinating daily office operations, document management, and report preparation.
- Supported project planning, scheduling, and data entry tasks using Microsoft Office tools.
- Collaborated with departmental heads to improve workflow efficiency and ensure timely task completion.
- Prepared presentations and official correspondence to support management decisions.
- Facilitated communication between departments and ensured compliance with internal policies.

Web Developer (Remote) - LARAgigs

- Successfully constructed a dynamic website leveraging Laravel and MySQL, Showcasing strong skills in both frontend and backend development.
- Responsible for integrating third-party APIs and services into web applications, ensuring efficient handling of API requests and responses.
- I optimized application performance by enhancing database queries, implementing effective caching strategies, and managing load handling. I utilized Laravel tools such as caching, queues, and scheduled tasks to achieve these optimizations.

Web Developer (Remote, Freelance) - APCFRANCE

- Translating design mockups into functional, responsive web pages using HTML, CSS, and JavaScript, while ensuring compatibility across different browsers and devices to deliver a seamless user experience.
- Analyzing and optimizing server performance to ensure fast and reliable web applications. Skilled in implementing advanced caching strategies, load balancing, and other optimization techniques to enhance overall system efficiency and user experience.
- Writing and running comprehensive server-side tests to ensure robust application functionality. Consistently monitoring application performance and proactively addressing any issues to maintain optimal operation.

Web Developer (Freelance) - HOUSE OF FUNKE

- Optimized PHP scripts and SQL queries to enhance performance and efficiency. Implemented advanced caching strategies to improve application speed and reduce server load.
- Developed and implemented user authentication systems, including login and registration processes, ensuring secure access control.
- Configured and managed user roles and permissions to tailor access levels and enhance security.

CERTIFICATIONS

-
- Web development, Design with blocks.
 - Bachelor of Technology, Ladoke Akintola university of Technology.
 - National Youth Service Corps

PROJECTS

- FarmFest Connect Web App: A digital platform developed to connect farmers, vendors, and agricultural service providers in a centralized ecosystem. The application showcases services offered, completed agricultural projects, and years of field expertise. Designed with a clean, responsive interface to enhance user interaction and trust. Built to demonstrate strong frontend development skills, seamless content presentation, and effective information delivery in the agri-tech space.
- Portfolio Web App: A professional portfolio web application highlighting completed projects, years of industry experience, and service offerings. Designed with a modern, responsive user interface to present content in an engaging and visually appealing manner. Built to showcase frontend expertise, intuitive navigation, and clear information architecture.
- TINTECH Web App: Weather forecasting web application, incorporating real-time data integration, user-friendly interface elements, and advanced functionality to deliver accurate and dynamic weather insights
- AI STORE Web App: Integrated various features to enhance user experience, streamline transactions, and manage product inventory effectively.
- Beauty by miemie Web App: Designed and developed a full-stack salon management platform that enables customers to book beauty services, make payments, and manage appointments seamlessly online.
- Surebase Web App: Developed a modern insurance web platform designed to streamline policy distribution, agent management, and client onboarding processes.

SKILLS AND INTERESTS

Technical Skills: HTML, CSS, Tailwindcss, PHP, LARAVEL MySQL, PostgreSQL, JavaScript, Vue.js, Next.js, Express, Nodejs, Adonisjs, Typescript, RESTful API, MATLAB, Microsoft 365 Office tools, Canva and Google Workspace tools, ClickUp, Jira.

Soft Skills: Project Management, Time Management, Critical Thinking, Problem Solving, Adaptability and Flexibility, Attention to Detail, Multitasking, Excellent Communication, Leadership skills.

Interests: Soccer, Coding, Chess, Sci-fi

Languages: English, Yoruba, French.
